

The Dual Purpose Latrine Box

for use in camps

Easy delivery - fully equipped camps

In cooperations with the Swedish Rescue Agency, Clip-Lok has developed a combined transport box and latrine shelter which has resulted in **The Dual Purpose Latrine Box**.

During field trials and exercises the box was approved with excellent results and is now incorporated in their future operations. The Dual Purpose Latrine Box is designed to be used for shipping equipment to camps, and it can then be quickly and easily converted into a latrine. It immediately fulfils the needs for good sanitary conditions.

The Dual Purpose Latrine Box improves the initial sanitary conditions and prevents health problems before they arise. Secondly the box will help you to optimise the transport of equipment.

Your choice of equipment

To fulfil your demands the box can be adapted to solutions according to your requirements. As a standard Clip-Lok delivers The Dual Purpose Latrine Box with toilet configurations as shown below. To ensure easily disinfection, the base is film coated and has a pre-cut hole. If requested, also the sides can be delivered with film coating. The box offers privacy and can be locked from the inside.

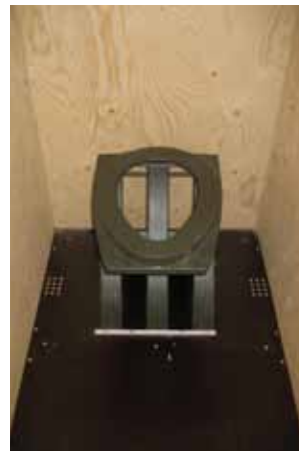

Standard toilet configurations

Full size toilet ready for use

Pacto® toilet placed in cabin

Toilet chair placed over the pre-cut hole

A squatting platform is held in place without screws, which ensures that it is easily removable for disinfection

The Dual Purpose Box without compromise

- Privacy
- Optimal sanitary conditions
- Reduced space and weight
- Secure transport of equipment
- Easy handling

Clip-Lok Dual Purpose Latrine Box

SA Patent Application No. 2008/08322

Clip-Lok Group

The Clip-Lok Group is a global network of packaging companies that cover marketing, sales, client liaison and manufacturing on five continents.

We manufacture a cost-saving, re-usable packing system, tailor-made for each assignment. The system is carefully managed by our engineers in co-operation with our customers, and we are dedicated to protecting the environment by using environmentally friendly materials and by manufacturing re-usable boxes.

Our high quality Clip-Lok boxes can be used time and again. They are tested and built to withstand vibration, stacking, impact and pressure. Goods shipped in a Clip-Lok box is well protected.
