

Among our many projects within the Aerospace industry is one for the transporting of helicopter parts from Spain to the United States. In this instance, the parts are extremely large and heavy, requiring an extremely strong box and precisely crafted dunnage. The result is a Clip-Lok box in which the product is protected and secure

Above: Very large box with dimensions 5.500 x 2.500 x 2.500

Above: Tailor-made dunnage for maximum security
