

Clip-Lok one way box for a remote weapon system (RWS)

The internal support system can accommodate variations of the RWS model. This custom designed dunnage along with the Clip-Lok QIK clips ensures a tool free packing process. The RWS and all accessories can be positioned and secured on the pallet base before the box sides are built up.

Clip-Lok boxes:

- are a cost and space saving solution for transport and storage of remote weapon systems.
- are fitted with unique cross support beam designed to accommodate different RWS models.
- are designed with a mixture of plywood and OSB sides for military use over rough and hostile terrain.
- can be easily and quickly packed without any tools, thereby increasing efficiency and handling.
- allow 4 way handling due to an integrated pallet base.
- can be stacked on top of each other without the need for racking.
- can be easily and quickly flat packed when not in use, thereby reducing storage volume by 80%.
- are suitable for transport by road, rail, sea or air.

A flat-packed box with all dunnage and QIK Clips completely enclosed within the flat-packed box.

The unique cross support beam can secure the different RWS models and stabilizes the box.

Strap connectors are imbedded in the base of the box to secure additional equipments.

The RWS is fully secured to prevent any damage during transport. Our boxes can also be painted and/or printed with item number, logo, text etc.
