

## Clip-Lok reusable and collapsible box for high ballistic body armor

This box is tailor-made for in-sequence packing of body armor. The padded sleeves protect the fragile edges of the armor. The box is a good solution for body armor in large operations as well as specialized forces. Four or more small body armor boxes are packed in one big Clip-Lok box for easy handling.

### Clip-Lok boxes:

- are designed for military use over rough and hostile terrain.
- can be stacked without the need for racking.
- can be customized to withstand a pressure of up to 15 tons.
- can be easily and quickly flat-packed, reducing transport and storage volume by up to 80%.
- can be reused - typically over 100 transports with normal handling.
- are suitable for transport by road, rail, sea or air.

The Clip-Lok Soft Rack dunnage is made from textile with various compartments for easy and safe storage of body armor sections of different sizes.

Clip-Lok Soft-Rack dunnage protects the body armor sections from damage while optimizing packing density. There is no need for extra packaging material.

The Soft-Rack lid protects the top edges of the armor sections from damage under transport. Sturdy nylon mesh straps ease handling.

Clip-Lok Soft-Rack safely transports body armor sections of various sizes. Four loaded body armor boxes are packed in the large Clip-Lok box as shown above. The textile handle makes it easy to load and unload from the larger Clip-Lok box. No nails or screws create a damage free environment to ship body armor sections.
