

### Clip-Lok reusable and collapsible box for truck dashboards

This cost-saving box and dunnage can hold eight dashboards for either right- or left-side steered vehicles. The closed box design provides excellent protection to the sensitive A-surfaces without the need for individual plastic wrapping. The box dimensions are highly optimized for transport in containers and trailers.

Clip-Lok boxes:

- can be stacked six high without the need for racking.
- can be customized to withstand a pressure of up to 15 tons.
- can be easily and quickly flat-packed, reducing transport and storage volume by up to 80%.
- can be reused - typically over 100 transports with normal handling.
- are suitable for transport by road, rail, sea or air.

The first two dashboards are packed in place. Each custom designed EPP shell fits both right- and left-side dashboards, so no extra dunnage sets are necessary.

The EPP shells provide full protection and maximum packing density. Without any further steps such as unwrapping parts, the boxes can be unloaded directly on the production line maintaining an optimized flow.

Dunnage sets for 32 dashboards can be transported in a single box. Expert craftsmanship ensures that the box will hold up under many return transports.

The closed box protects the parts from dirt and damage. The flat-packed box is ready for cost-saving return shipment or space-saving storage.
