2P box with hinged lid

Clip-Lok reusable and collapsible 2P box with a hinged lid

This special 2P box is easy to assemble or dismantle as the sides and lid are hinged in position. Only the front needs to be detached. When the box is flat-packed the volume is reduced to a minimum. This saves space in storage and saves costs on return transport.

Clip-Lok 2P boxes:

- have spring steel clips which are hinged on the box panels for easy handling.
- can be stacked without the need for racking.
- can be customized to withstand a pressure of up to 15 tons.
- can be easily and quickly flat-packed, reducing transport and storage volume by up to 80%.
- can be reused - typically over 100 transports with normal handling.
- are made of certified environment-friendly plywood.
- are suitable for transport by road, rail, sea or air.

The Clip-Lok box is easy for one person to assemble and dismantle. The lid is divided into two parts which can be folded to the sides individually.

The open box allows easy access to the goods, making it ideal packaging for Lean manufacturing. All of the custom designed dunnage is contained within the box.

The sides and lid fold into the box. Expert craftsmanship and finishing work ensure that the box will hold up under many return transports.

A fully assembled box and a cost-saving flatpacked box. The integrated pallet base allows 4-way handling.
