

Clip-Lok's cost-saving, reusable and collapsible box for aluminum busbars

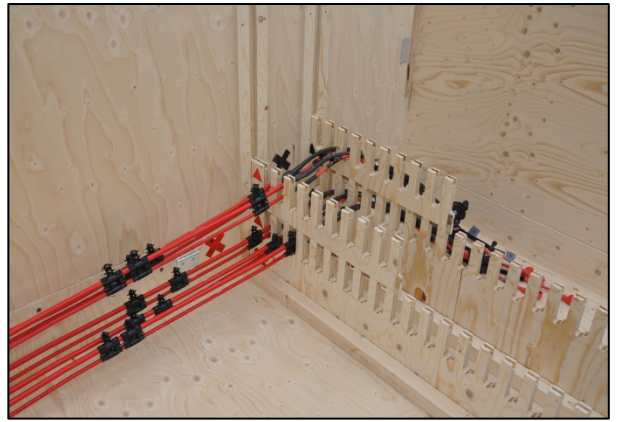

The unique design enables the users of this box to pack and un-pack the busbars in a simple, safe and efficient manner. The customized interior design of the box optimizes the number of parts which can be packed in the box.

Clip-Lok boxes:

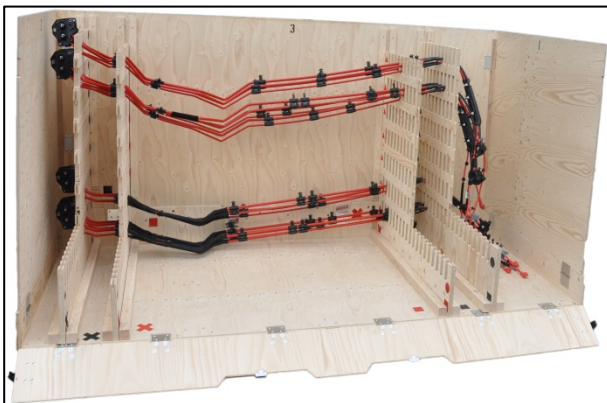

- are built with walk-in construction for best possible ergonomics
- can be stacked on top of each other without the need for racking.
- can be customized to withstand a pressure of up to 15 tonnes.
- can be easily and quickly flat-packed, reducing transport and storage volume by up to 80%.
- can be reused - typically over 100 trips with normal handling.
- are suitable for transport by road, rail, sea or air.

The unique interlocking dunnage is clearly marked for easy and precise packing

The custom designed plywood dunnage is 35% stronger than the cardboard alternative, providing better support and security to the Busbars during shipping and thus saving costs.

The walk in aspect of construction gives easy access to place or remove items for Just-In-Time and In-Sequence delivery.

50 flat packed boxes ready for use. The unique plywood inserts/dunnage is packed inside the collapsed boxes to secure that all parts are available at the packing line.
