

Clip-Lok reusable and collapsible box for metal sheet fenders for tractors.

This box is tailor-made for in-sequence packing of metal sheet fenders. HDPE brackets are used on which the fenders hang. A locking mechanism is placed on the top to secure the fenders during transport. Our box offers fender manufacturers to send more parts per box and provides best product protection.

Clip-Lok boxes:

- are ideal packaging for lean manufacturing.
- can be stacked without the need for racking.
- can be customized to withstand a pressure of up to 15 tons.
- can be easily and quickly flat-packed, reducing transport and storage volume by up to 80%.
- can be reused - typically over 100 transports with normal handling.
- are suitable for transport by road, rail, sea or air.

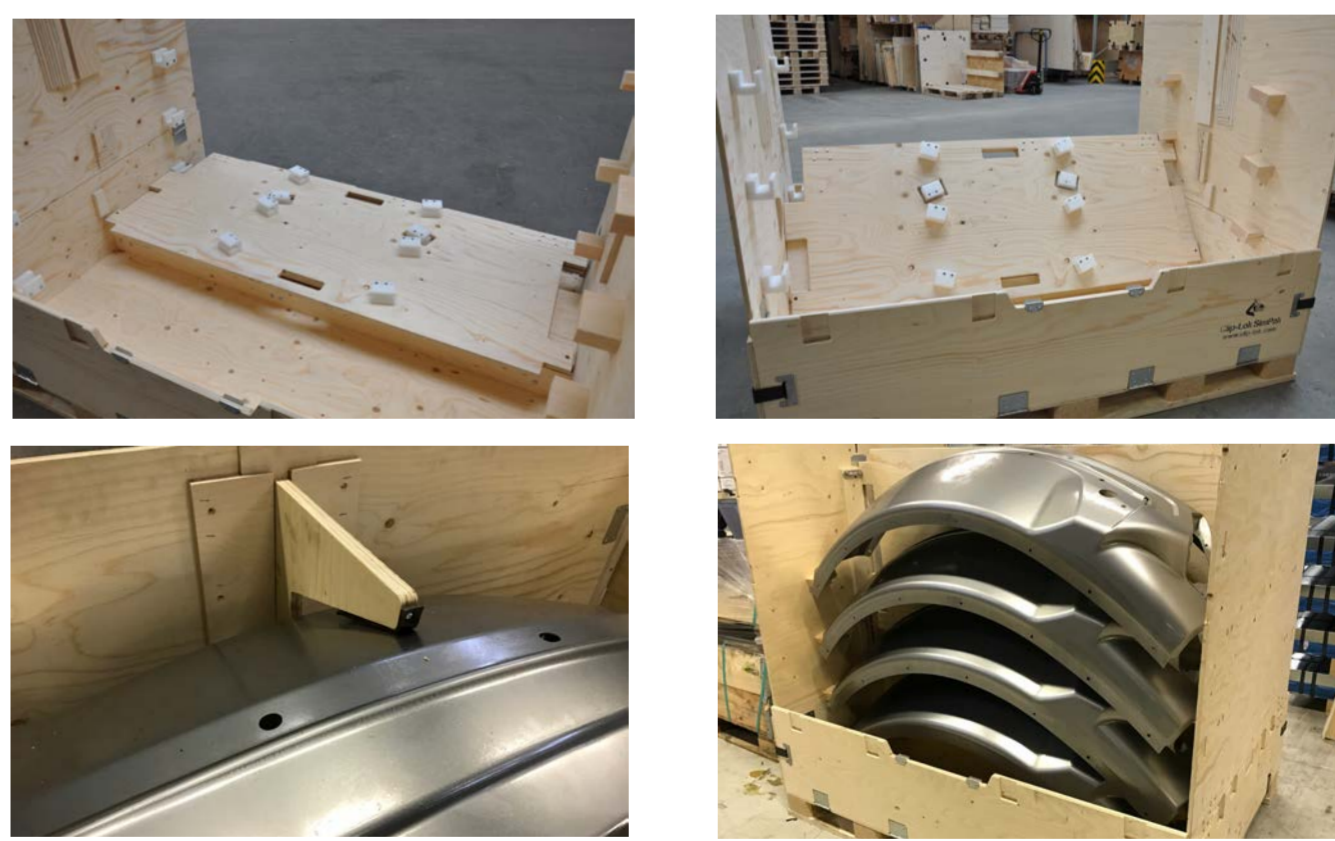

The final product - a tractor with the fender.

Clip-Lok 2P box for fenders flat-packed with dunnage.

Fenders on HDPE dunnages secured for transport.

Different phases of the Clip-Lok 2P box assembly. The locking feature on top secures a box of fully loaded fenders during transport.
