

Clip-Lok reusable and collapsible steel rack for automotive industry is strong and non-fibrous.

Our steel racks create a non-fibrous environment on the production floor which means low dust contamination. Steel construction adds strength enabling it to withstand heavy impacts.

Clip-Lok steel racks :

- can be easily and quickly flat-packed, reducing transport and storage volume.
- are low maintenance as damage during forklifting is negligible.
- can be customized to withstand a pressure of many tons.
- are weather proof and can be stored anywhere.
- are suitable for transport by road, rail, sea or air.

The Clip-Lok Steel Rack is flat packed and ready to be assembled to transport any delicate products.

The short sides of the steel rack are erected. The long sides could also be detached, if required.

The lid is divided into two halves and hinged towards the long sides. It could be operated using only one hand.

The lid is in position and its metal reinforcement allows stackability without risk.
