

Cabinet box

combined transport- and storage box for camps

The cabinet box is one of Clip-Lok's most sold reusable multi functional boxes. It is designed to function as a transport box and when emptied at destination, it is converted into a cabinet. The shelf system is detachable and during transport of goods the shelves are placed flat under the lid.

The box can be used as wardrobe or for hospital equipment, kitchen aid etc. To prevent un-authorized access, it can be provided with a locking system.

It is designed to be shipped by air, sea, rail or road either loaded with items or as flat pack. When collapsed it only takes a minimum of space.

Clip-Lok uses environmentally friendly materials certified by FSC or PEFC.

Packed and ready for shipment. The box has a base with a four way pallet construction

The cabinet box is designed to fit into a container. Two boxes on the long side, three boxes on short side

In upright position the box can be used as a wardrobe for clothing, personal equipment and belongings
