

**Product:** Reusable, collapsible transport 2P box for Novo Nordisk casting moulds

- Specifications:**
- The bottom of the Clip-Lok box is reinforced to carry large and heavy casting moulds
  - The design of the Clip-Lok box allows easy loading and de-loading of the casting mould
  - Adjustable blocks hold the casting mould in position
  - Strong straps keep the casting mould stable during transport
  - An extra panel can be inserted to secure safe packaging of ancillary equipment

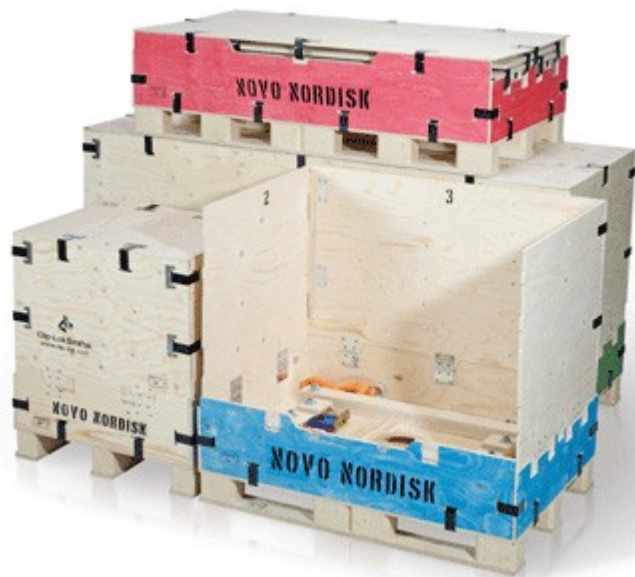

The 4 tonnes heavy casting mould is now secured in its position. The panel divider to the left creates room for safe packaging of ancillary equipment

The blocks can be adjusted to match the size of the casting mould. The blocks hold the casting mould in position

The straps are safely secured in the double pallet

The Clip-Lok boxes can be designed to match any size of casting moulds.
