

Clip-Lok reusable and collapsible box for ocean towable bladders

This box is built to contain large bladders which are used to store and ship liquids such as water, fuel and oil. An empty bladder and all its accessories fit in a single box. The bladder can be shipped where needed, used and then packed away for later use. Venting panels built into the box ensure that the bladder can dry.

Clip-Lok boxes:

- can be easily and quickly flat-packed, reducing transport and storage volume by up to 80%.
- are made of certified environment-friendly plywood.
- can be reused - typically over 100 transports with normal handling.
- can be customized to withstand a pressure of up to 15 tons.
- are suitable for transport by road, rail, sea or air.

The emptied bladder will be folded into the box together with its accessories. The top and sides of the box are removable to allow easy access.

Built-in venting allows the bladders to dry. The box is assembled with externally fitted spring steel clips which are easy to insert and remove. No nails or screws are used.

Clip-Lok boxes can be stacked without the need for racking.

A packed box, ready for shipping. Heavy-duty plywood and custom design ensure safe transport of the bladder.
