

Clip-Lok Clima-Control box for temperature sensitive transport.

The Clip-Lok Clima-Control box with TempGel ensures stabilization of temperature inside the box. The unique TempGel creates a temperature-stable microclimate inside the box that can be tailored to protect the product from temperature fluctuated damages during transport.

Clip-Lok Clima-Control boxes:

- create micro-climate environment for temperature sensitive transport under extreme conditions.
- have the unique TempGel which shields and provides insulation to the product for long periods.
- are the best available cost effective and modern solutions for conventional frozen, chilled or heated transport.
- can be transported by rail, road, air as the temperature-controlled boxes do not require battery or auxiliary power.
- can be designed and manufactured in any dimension
- are non hazardous, environment friendly and UN certified.

Clip-Lok Clima-Control Box assembled around the insulated dunnage to protect the product from temperature fluctuations

Clip-Lok Clima- Control box with TempGel creates a microclimatic environment for the product.

Clip-Lok Clima- Control box with TempGel to provide tailored and stable temperature even in narrow temperature ranges.

The product is protected by the gel inside the Clip-Lok Clima-Control Box.
