

Recycling

Product: Glass cullet and auto windows
Weight: approximately 1200 to 1700 kg
Country: Scandinavia

The recycling industry is a fast-growing market in Scandinavia. Due to new governmental regulations, companies are investing in better recycling programmes for their waste and a change of focus to reusable packaging. In one project, the glass goes from windscreen to recycling container in a Clip-Lok box, which is then collapsed and returned for the next consignment.
