Clip-Lok SimPak (Scandinavia) ApS  
Att.: Anders Lassen  
Enghaven 9  
3450 Allerød  
Danmark

We are pleased to confirm that we are using the Clip-Lok system for transport and storage of fat and oil products supplied from the tropical regions of the world as well as the arctic.

We have today more than 1.000 boxes in circulation and the system works to our satisfaction.

We selected the Clip-Lok system for the following reasons:

- The functionality, quality, price relations are prior to alternative collapsible re-usable liquid boxes.
- The boxes may be stacked 4 high on top of each other without the use of pallet rackings.
- No special tools or accessories are needed to erect the boxes for use, which are important in remote areas.
- Flatpack ratio of 1:5 is very good.
- If damaged during transport to filling areas, Clip-Lok is very easy to service in the field without tooling.
- Tested and approved by independant testing institute for transport of liquids.

We look forward to continuing our good corporation.

Yours faithfully,

Arne Hansen  
Technical Project Manager
