To Whom it may Concern

**LETTER OF RECOMMENDATION
CLIP-LOK SIMPAK BOXES AND PACKAGING SOLUTIONS**

BAE Land Systems South Africa has been using Clip-Lok boxes for over 15 years. BAE has only had positive experiences with Clip-Lok packaging.

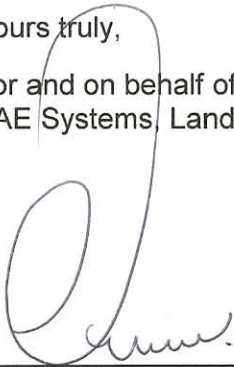

The system has been used for the shipment of our products overseas. The Clip-Lok boxes have consistently proved to be strong, reliable and ideal for the wide range of products, which we ship. As an extra bonus, the Clip-Lok system is ergonomically easy to erect and flatpack which is beneficial for the workers loading and unloading the products from the cases. Currently we have a selection of 58 different boxes which are used to transport spare parts ranging from the more delicate brake pipes to heavy and robust vehicle bodyparts.

Clip-Lok is custom made and therefore always meets the exacting requirements of BAE Land Systems. Clip-Lok boxes are fully ISPM 15 compliant and can therefore be shipped to all parts of the world without restriction.

We would heartily recommend Clip-Lok boxes to other companies who need packaging. BAE look forward to many more years of successful and mutually beneficial business with Clip-Lok.

Yours truly,

For and on behalf of
BAE Systems, Land Systems OMC
