Re: Clip-Lok Packaging

We have the pleasure in confirming to you that our company has been using these re-usable and flat packable cases since 1992.

These Clip-Lok cases arrive from OPEL, Germany and contain auto components, also in CKD form.

Our personnel manipulates several thousand of Clip-Lok cases every month, with great efficiency. The Clip-Lok cases are placed on the edge of our assembly line, they are made to measure, stackable 5 to 6 cases high, they can be opened from the sides which makes easy access for the worker. Once emptied with a simple operation the boxes can be dismantled and stored outside ready to be returned for re-use for at least 25 times.

We are able to notice throughout the years that the auto components are well protected inside the Clip-Lok case.

Thank You for your Collaboration,

Sincerely,

Signed

Material Handling
