Danmark

Att.: Anders Lassen

We have the pleasure to confirm that we are using Clip-Lok for storage and transport of our liquid fishoils and similar products.

The 1.000 liter Clip-Lok Bag in Box is specially adapted for use with the Tetra Laval systems and it works to our full satisfaction.

With seasonal products as ours it is difficult to obtain a usage rate with liquid boxes greater than 2 times a year, which normally is not enough to justify the investment in returnable liquid boxes.

Using Clip-Lok we do obtain feasibility for the following reasons:

- Clip-Lok is inexpensive compared to alternative collapsible, re-usable liquid boxes.
- Flatpack ratio of 1:5 is very good.
- Low service and maintenance costs.
- No contamination problems when using the 1.000 liter polyethylene bags.

We plan to expand the use of Clip-Lok in the future and look forward to a continued good corporation.

Yours faithfully,

Viktor Johnsen
Production Manager
