Humanitarian organisations

## Humanitarian organisations

---

§ H.O.'s which has an interest for Clip-Lok:

§ National rescue organisations

§ Red Cross

§ UN

## Humanitarian organisations

---

- National rescue organisations
- Using Scandinavia as example:
  - Denmark: Beredskapstyrelsen
  - Norway: DSB
  - Sweden: MSB
  - Finland: FRS

## Humanitarian organisations

---

- National rescue organisations
- Have several tasks.
- Domestic:
- Assist during domestic disasters such as forest fires, earthquakes, floods and so on.

## Humanitarian organisations

---

- National rescue organisations
- International:  
Assist during international disasters and cooperate with other humanitarian organisations.

## Humanitarian organisations

---

- National rescue organisations
- Why using the national capacity abroad?
- Two main reasons,
  - 1, Increase their knowledge and experience, tune the organisation and the readiness.
  - 2, The government tool in terms of international presence and disaster support.

## Humanitarian organisations

---

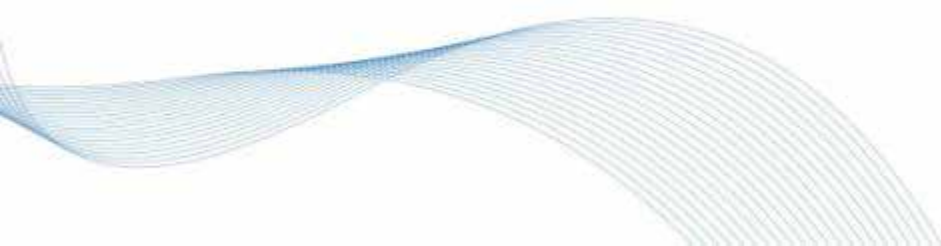

- National rescue organisations
- Domestic/international:
- Assist during international disasters involving domestic citizens like the tsunami i.ex.

## Humanitarian organisations

---

- National rescue organisations
- The ratio between operations over the last 5 years as follows:
- More than 95% international
- Less than 5% domestic

- 
- Red cross works normally only abroad.
  - Different countries responsible for different issues, f.ex. Sweden is responsible for mainly water supply, Finland for field hospitals and so on.
  - Together they build camps with all necessary eq.
- 

## Humanitarian organisations

---

- What's in it for Clip-Lok?
- Using similar material like the army...

## Humanitarian organisations

---

## Humanitarian organisations

---

## Humanitarian organisations

---

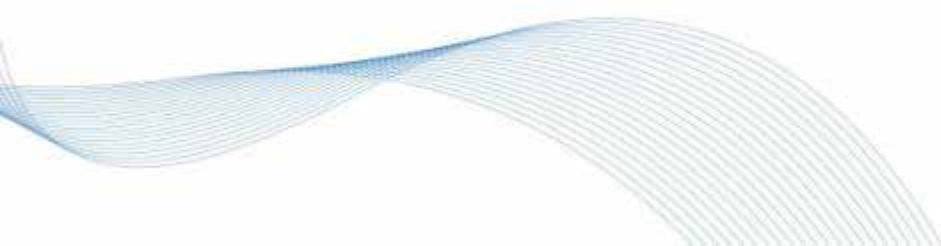

## Humanitarian organisations

---

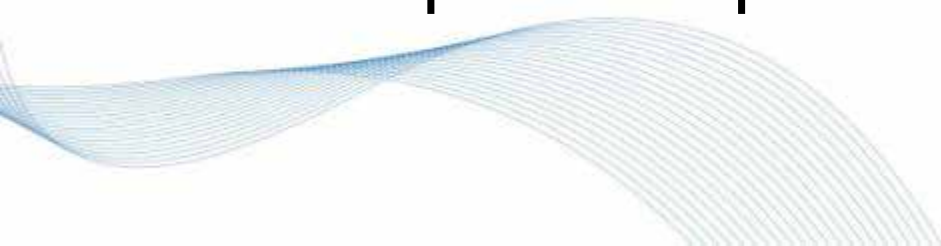

- 
- Tents
  - Heaters/Ac units
  - Tailor made boxes for furniture, kitchen eq, IT and so on.
  - Miscellaneous boxes that fits aircrafts like C130, IL and AN.
- 

- 
- Why Clip-Lok?
  - Several reasons,

## Humanitarian organisations

---

- Normally, the shipping cost exceed the material cost.
  - It's therefore important that:
    - The package density is good.
    - That the parts arrives in good shape so they doesnt have to resend them.
    - To keep the response and loading time low.
- 

## Humanitarian organisations

---

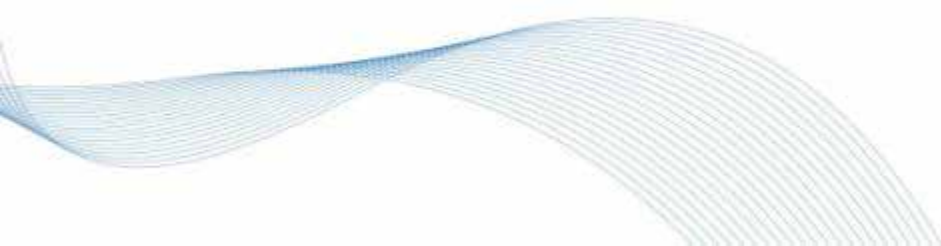

- To improve their capability, they practice a lot, partly with regular personell and partly with sister organisations. Reuseable boxes instead of one way boxes, makes it possible to re-pack all equipment after use.

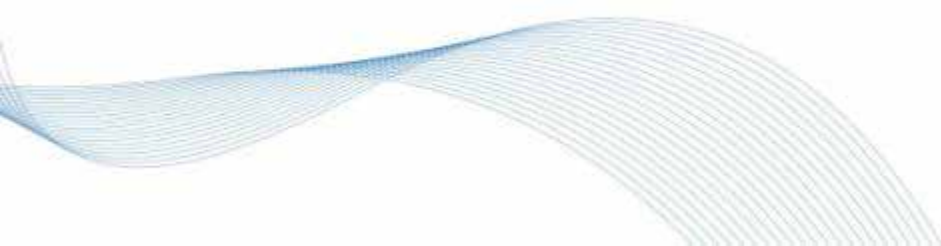

## Humanitarian organisations

---

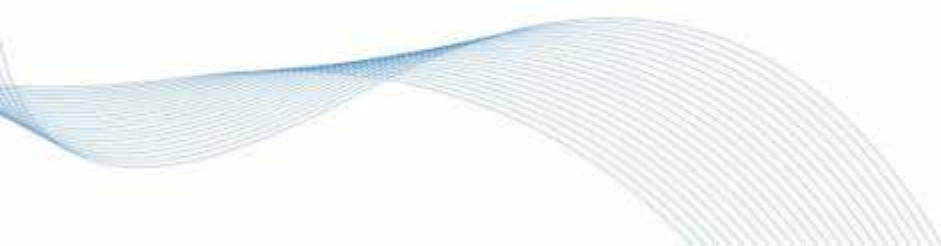

After an operation abroad, they normally donate accurate equipment to local organisations who will re-pack the equipment and put it on stock waiting for next emergency.

Suitable, reuseable boxes will secure the material and improve the response time.

- 
- Tents(and its packaging) is one of those items which is considered as disposable items.
  - IOW, they will not be taken back nor re packed again.
- 

- 
- The tents will need a box during transport otherwise they will be damaged.
  - A eur-pallet with 10 collars, lid and straps represent a cost of aprox 100-150€
  - Neither pallet or collars can be of any use on a emergency area.
- 

- 
- The DP-box will solve:
  - Transport issue(well optimised)
  - Packaging issue
  - After arrival, the box is converted to either latrine or shower – "free" of transport cost.
-
