

Remote weapon station Kongsberg Protect System

Background

 A big thank you to James for opening the door to Kongsberg Group

Scope

- Kongsberg Group is a large OEM producer
- OEM (Original Equipment Manufactor)
- Until now sold 12.000 units to US army
- Recently won the right to deliver a further
 6.000 units.

Kongsberg Group

- Kongsberg Maritime
- Kongsberg Oil & Gas Technologies
- Kongsberg defence Systems
 - F-35
- Kongsberg Protect Systems
 - RWS

Kongsberg Protect Systems

- Product range
 - Protector RWS (remote weapon station)
 - Small/medium size ammunition
 - Custom designed models
 - CROW
 - Weight 175 kg
 - Protector MCT-30
 - 25-50mm cannons
 - Weight 1,5 Ton

Packaging requirements

- One box fits all RWS models
- Flat packed and reusable
- Same box for delivery, service and storage
- Challenge
 - Many different shaped models

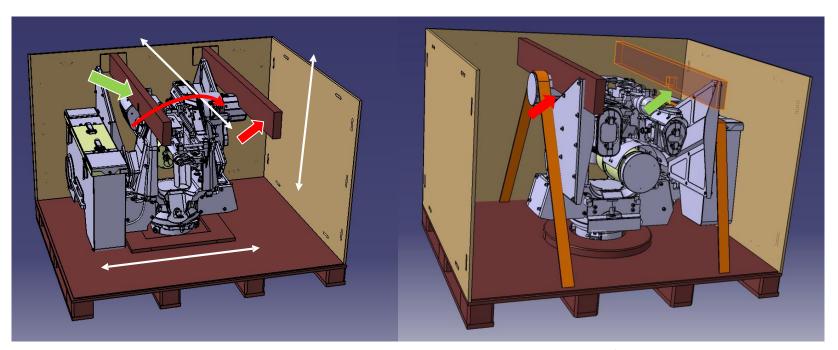

Challenge

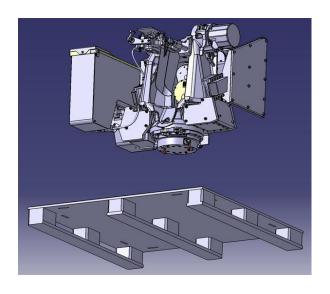

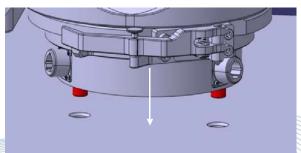

The supporting beams would not fit to all models. Therefore the design must be improved.

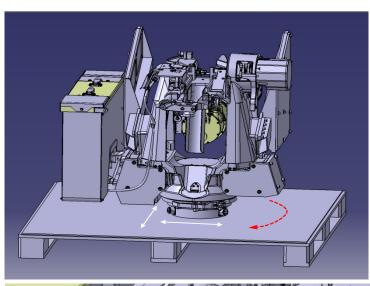

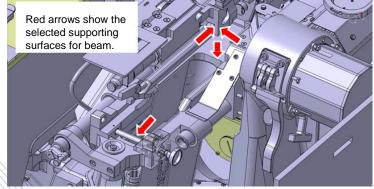

- MP box with dunnage for holding the RWS in place.
- Flat packed and reusable
- Box dimension: 1100x1050x1000mm
- 300 EUR/box in serial production

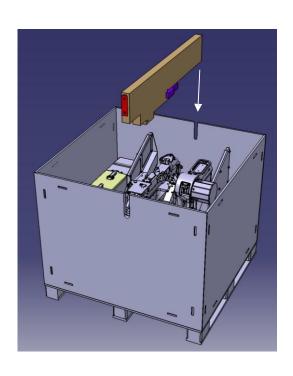

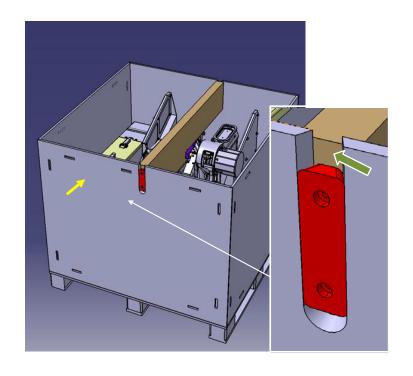

Advantages

- Existing one way box
 - Costs 200 EUR
 - Assembly time 2 hours
- Clip-Lok box
 - Costs 300 EUR
 - Assembly time 15 min
 - Reusable
- Total price is almost the same for both options

Why is this segment so interesting for Clip-Lok?

- OEM customer
 - Everytime they sell one unit → CL has a potential to sell one box
- defence budgets are cut
 - defence customers are still spending more on better protection for their soldiers
 - E.G RWS, body armor, vehicle armor etc.

Potential

- All producers of RWS
 - Kongsberg Protect Systems have sold 18.000 units to US armed forces.
- All users of RWS
- Kompass.dk can help us identify these potential customers

Any questions?

Thank for your attention!
