Roger Tillberg

Plastic Clips

- Successes One-Way solutions:
 - Comsys - Drivers
 - Kongsberg - RWS
 - Volvo – Autom. – Windshields (steelclip)
 - Ecolean – Filling equipment(Tetra Pak) – Juice
 - Hospital equipment – X-rays, Cancer care
 - Grinding machines – concrete floor etc.

- WHY?

Benefits:

- Handling – like a regular box or pallet
- Easy to build up around the article
- Protecting the article
- Time saving like the return box
- Flat packed
- Less cost due to material cost and clip cost
- Very good staple strength after test at BVI
- Stackability

Solutions

Sum up

- For a customer as Comsys that provide the market world wide with Driver units that regulates the power peaks in industries, fishing boats etc. It's very important the packaging is reliable due to that the Driver unit is of high value and it takes time to replace it with a new unit.
- It's also very important that the packaging can be built up around the article and by any one and the same when they empty the box.
- This due to that not everyone in the customer chain has employees that have knowledge about packaging.
- And the design for a customer as Comsys is made so that they can handle 3-4 different types of driver ins the same box solution due to the placing of the thread insert in pallet bottom.
- This saves cost and time when they can use the same type of solution to all articles.
